GROWING YOUR SAVINGS

Investing your savings with CPF Investment Schemes

Discover how you can make your CPF savings work harder for you.

OVERVIEW

CPF savings can be used in these investment schemes.

1. CPF Investment Scheme (CPFIS)
The CPF Investment Scheme (CPFIS) lets you invest your Ordinary Account (OA) and Special Account (SA) savings in a wide range of investments to enhance your retirement savings.

2. Special Discounted Shares (SDS) Scheme*
The Special Discounted Shares (SDS) Scheme is part of the Government's asset enhancement programme to make Singapore a share-owning society, giving Singaporeans a greater stake in the country.

*Only applicable to Discounted Singapore Telecom (Singtel) shares offered in 1993 and 1996

ELIGIBILITY

Who can invest under CPFIS

Anyone above age 18 can invest as long as they meet the criteria.

Criteria for investing under CPFIS

You can invest under CPFIS if you:

- are at least 18 years old;
- are not an undischarged bankrupt;
- have more than $20,000 in your OA; and/or
- have more than $40,000 in your SA; and
- have completed the CPFIS Self-Awareness Questionnaire (SAQ) (applicable to new investors with effect from 1 October 2018)

Take SAQ >

How much CPF savings you can invest

CPF Investment Scheme-Ordinary Account (CPFIS-OA)

You can invest your OA savings after setting aside $20,000 in your OA

In addition, you can only invest up to 35% and 10% of your investible savings in stocks and gold, also known as the stock and gold limits. Investible savings refers to the sum of your OA balance and the amount of CPF you have

CPF Investment Scheme-Special Account (CPFIS-SA)

You can invest your SA savings after setting aside $40,000 in your SA.

Available OA and SA savings that can be used for investment

You can find out how much of your OA and SA savings you can invest via the following ways:

1. Log in to my cpf digital services with your Singpass > Select my cpf > My dashboards > Investment
2. Log in to CPF Mobile app with your Singpass > Select My Investment; or
3. Visit any CPF Service Centre with your identity card.

OPTIONS

Your investment options

You can invest your CPF savings in a wide range of investment products. However, CPF Board does not endorse any product providers or investment products that are included under the CPFIS.

EVALUATE

Factors to consider before investing

All investments are subject to risk. Risk refers to the possibility of losing part or even all of your investments due to financial market changes.

Understanding the risks of various investment options can help you better decide which investments best match your investment goals, risk tolerance and personal circumstances.

1

Investment goal

Understand why you are investing and set an investment objective (e.g.

2

Risk tolerance

Ask yourself:

- What's the amount of risk

3

Investment time horizon

Consider the duration of your investments. As CPF savings are

a long-term goal of growing your savings to $X at the end of 25 years for retirement).

you're comfortable with and can afford to take?

- Can you handle temporary short-term losses in your investments?
- Do you have enough savings to absorb the investment risks?

Take the Risk Tolerance Questionnaire to assess your risk tolerance.

meant for your retirement, they're generally for long-term purposes unless you're nearing retirement or have a short-term investment time horizon for other reasons.

4

Overall financial situation

Consider your financial commitments and the amount of money you'll need to sustain your lifestyle during retirement. If you have other assets set aside for retirement besides your CPF savings, how are these assets invested?

5

Opportunity costs

Consider the interest rates that you're earning from your CPF accounts and the cost of investments (i.e. fees and charges for investing in the product).

Only invest your CPF savings if you're confident of earning more than the CPF interest.
