Closure of Special Account for CPF members aged 55 and above and other CPF enhancements

Closure of Special Account for CPF members aged 55 and above

The Special Accounts (SA) of approximately 1.4 million CPF members aged 55 and above have been closed on 19 January 2025. The closure of the SA was announced during Budget 2024.

With the closure of the SA, savings from the SA have been transferred to the Retirement Account (RA), up to members' cohort Full Retirement Sum (FRS), where they will continue to earn the long-term interest rate from January onwards[1]. Any remaining SA savings have been transferred to their Ordinary Account (OA) where they will earn 2.5% interest per annum, and members have the flexibility to withdraw them when needed. If members would like to continue earning the higher interest rate of 4% per annum and enjoy higher retirement payouts, they can transfer these OA savings to their RA up to the current year's Enhanced Retirement Sum (ERS). This transfer is irreversible, and can be made anytime, but if members wish to earn the higher interest from January onwards, the transfer must be processed by January 2025[2].

From 20 January 2025, members will be notified through a hardcopy letter, as well as an email or SMS where applicable, on the closure of their SA. Members can also view the amounts transferred to their RA and/or OA in their online Transaction History by logging in to their CPF account at cpf.gov.sg or using the CPF Mobile application. For more information on SA closure, please refer to Annex for a list of Frequently Asked Questions.
