FEATURES

How your payouts work if you're not on CPF LIFE

1

Starting monthly payouts

You can apply to start receiving monthly payouts at any time after age 65. Payouts will start automatically at 70 if you have not chosen to start earlier.

2

How payouts are calculated

Your monthly payouts will be calculated to last you up to 20 years from your payout eligibility age, based on the prevailing interest rate earned on your Retirement Account savings when you start your payouts.

3

Extended payouts through extra interest

Did you know you earn extra interest of up to 2% per annum on your retirement savings? This interest earned will be used to extend your payouts, up to age 90.

Find out more >

4

Increasing and extending payouts

You'll either receive more payouts or enjoy an extended payout duration, when you choose to defer your payouts. Another way you can receive more, is to make cash top-ups or CPF transfers to your retirement savings.
